

➤ Sport In The Box 2 Swimming

- Sport In The Box 2 is our latest generation of software to create immersive videoboard productions for sports.

Sport In The Box lets you create and control dynamic content on your videoboards, to engage both audience and athletes by easily creating a professional production. Sport In The Box handles video, lane presentations, live scoreboards, commercials. Synchronized playout to multiple video screens, an perimeter boards, and outputs for streaming or broadcast. Sport In The Box is also easy to use and flexible in setup, allowing it to be the perfect solution for both smaller clubs and in larger arenas.

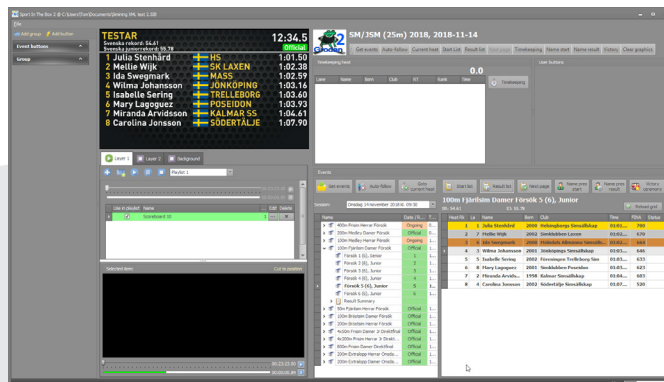

Result Handling Systems

Sport In The Box can connect to the most common result handling systems and more can be implemented upon request.

Current software supported are:

- Wingrodon 1 & 2
- Hytek Meet Manager
- Splash

It is also possible to connect Sport In The Box directly to Quantum timekeeping.

Graphics and Data

Sport In The Box comes with graphic templates to create fullscreen scoreboards, swimmer presentations and victory ceremonies. It also comes with overlay "TV" graphics to be used on top of live video inputs. The templates can be customized by selecting your club colors to create tailored presentations straight out of the box.

Custom graphics templates made from the customers own design can also be created upon request.

400M Freestyle Women					2:58.12

7	Linnéa Bielicz	21.50	2	200m	2:27.10
8	Dominika Gerzova	21.08	2	200m	2:33.74
6	Sini Koivu	20.90	2	200m	2:29.41
1	Isabelle Hanson	20.48	2	200m	2:22.98
2	Camilla Rimmereide	22.43	2	200m	2:30.10
3	Greta Nykvist	21.94	2	200m	2:28.12
4	Lil Zyprian	22.21	2	200m	2:23.56

Video Inputs, Replays and Payout

Sport In The Box can have multiple live video inputs and together with graphics and the ability to make replays and play other video contents allows the operator to create a full video production for the videoboard. Sport In The Box also supports multiple video outputs for setups with more than one videoscreen. Size and position of each video output can be set to match any videoboard, to remove the need for expensive scalers. Contents can also be setup to allow synchronized playout over different screens at the click of a single button.

RESULTS 100M FREESTYLE, WOMEN, FINAL
