

WATERPOLO

CALYPSO LED Shot Clocks

OVERVIEW

Connected to and synchronized with an optional *Calypso* Water polo controller as the main timing device, the shot clocks follow the start/stop commands of the referee.

CALYPSO features a two digit display for the 30 seconds shot time.

As soon as the clock reaches zero an acoustic signal is emitted.

The shot clock is powered by an external power module supplying 24 VDC.

The angled, wide based design makes the display extremely stable, and the 24 cm height of the LED digits ensures excellent visibility for the players and spectators alike.

CALYPSO shot clock, with complete set in the background

TOP FEATURES

- Powerful sound
- Wide legs for maximum stability
- Big LED digits for excellent visibility
- DC-DC converter for stable luminosity

SPECIFICATIONS POWER SUPPLY

Power Supply

Dimensions : 380 x 200 x 310 mm
 Weight : 6.2 Kg
 Power supply : 300 VA 115 - 230V
 Sound power : 114 dB (pneumatic horn)
 Certifications:  and  RoHS compliant
