

➤ Sport In The Box 2: Multisport

Production and playout system for sport

Sport In The Box is a powerful production and playout system for sport that lets the user create engaging live content and output it to videoboards, in-house tv systems and streaming.

It handles playout of stored images and videos, live video inputs, replays and graphics, both full screen scoreboards and overlays for TV. With great flexibility Sport In The Box can output almost any format and resolution to adapt with custom video screens, making it the ideal solution for both smaller clubs and larger arenas.

Sport In The Box can have multiple live video inputs with SDI,HDMI or NDI and the output windows can be placed in any size and position on the desktop to adapt to the LED-screens used, removing the need for a video scaler.

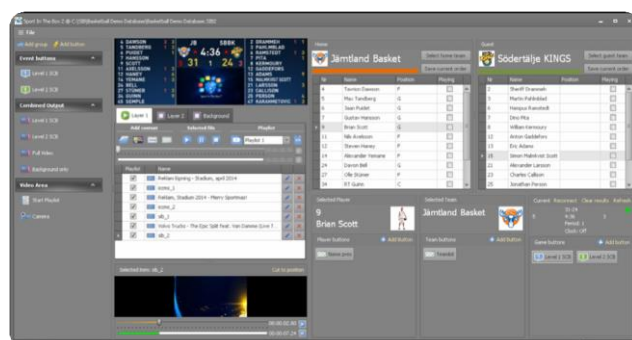

Sports

Sport In The Box has a team interface where teams are managed and saved. Each team with name, logo and player lineup with names, numbers, pictures and positions can be entered. Together with the live data from a connected match controller, Sport In The Box can display scoreboards, player presentations, team lineup and penalties at the click of a single button.

Sport In The Box currently has supports for: Handball, Basket, Football, Ice hockey, Volleyball, Tennis, Floorball, Rugby, American Football.

TOP FEATURES

- Supports: Handball, Basket, Football, Ice hockey, Volleyball, Tennis, Floorball, Rugby, American Football
- Connects to Saturn console
- Multiple databases for different sports in the same arena
- Output windows in any size and position on desktop removes the need for a scaler

Graphics

Sport In The Box comes with different graphics templates depending on sport. Overlays for use on video and fullscreen versions for scoreboards. Templates can be customized with the users choice of colors.

Custom graphics can be implemented upon request.

Basket scoreboard with video

Results overlay - Handball

Results overlay - Tennis

Player presentation scoreboard - Football

Player presentation overlay - Hockey

Example of graphics included with Sport In The Box

Sport In The Box can have multiple screen controllers that render different content at the same time. This can be used to control multiple screens, or used to divide one screen into separate parts. In the example, a football video board has been divided into 3 parts, one part for live video in 16:9 format, one banner for advertising and finally one part with a custom scoreboard template. Together with combined output layouts, it is possible to make animated switches between different layouts, for example bringing the live video to fullscreen.

Type	Sport In The Box FULL	Sport In The Box LIGHT
