

PRODUCT

Sport In The Box

SPORT IN THE BOX / MULTISPORT

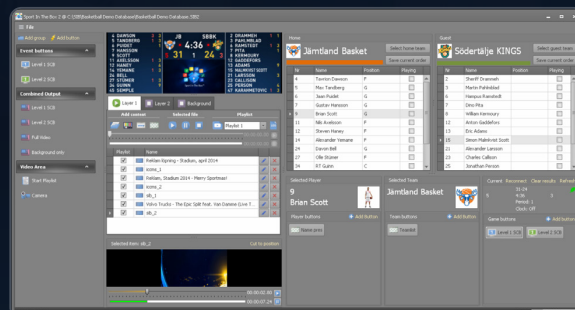

One production system for every screen in the arena.

Sport In The Box is a powerful production and playout system for sport that lets you create engaging live content and output it to videoboard, in-house TV systems and streaming. It handles stored images and videos, live video inputs, replays and graphics — both full-screen scoreboards and overlays for TV.

SDI · HDMI · NDI in

Videoboard · TV · Stream

14 sports

NO SCALER NEEDED

Output windows can be placed in any size and position on the desktop to match your LED screens exactly — any format, any resolution. No external video scaler required.

01 KEY FEATURES

Live video inputs

Multiple simultaneous live inputs over SDI, HDMI or NDI — mixed freely with graphics, replays and stored media.

Teams & players

Team database with names, logos and lineups. Player presentations, lineups and penalties at the click of a single button.

Replays & playout

Instant replays plus playout of stored images and video for pre-game, period breaks and sponsor loops.

Multiple sport databases

Separate databases for different sports in the same arena — one installation runs every code in the house.

Scoreboards & TV overlays

Sport-specific graphics templates — full-screen scoreboards for videoboard and overlay versions for TV.

Live match data

Connects to the Score Pilot game console for clock, score and penalties pushed in real time to every output.

02 GRAPHICS · INCLUDED TEMPLATES

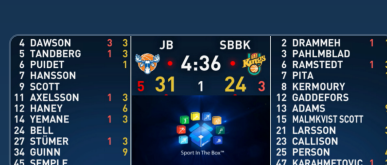

Results overlay

TV overlay graphics keyed over live video — shown here for handball.

Player presentation

Photo, number and name from the team database — scoreboard version.

Basketball scoreboard

Full-screen scoreboard with lineups, clock and live video window.

& more

Layouts per sport · custom graphics.

03 SUPPORTED SPORTS

Handball

Basketball

Football

Volleyball

Tennis

Floorball

Rugby

American Football

Athletics

Futsal

Equestrian

Ice Hockey

Swimming

Waterpolo

Sport In The Box

04 MULTIPLE SCREEN CONTROLLERS

Divide one board — or drive many.

Screen controllers render different content at the same time. Use them to control several screens, or divide one videoboard into separate parts — live video, advertising and scoreboard side by side.

Example — one football videoboard, 3 parts.

A football videoboard divided into three parts with three screen controllers: live video in 16:9, an advertising banner, and a custom scoreboard template. This flexibility makes Sport In The Box the perfect playout system for any videoboard.

05 COMBINED OUTPUT LAYOUTS

Animated switches between layouts.

Combined output layouts make animated transitions between screen setups — for example bringing the live video to full screen at the press of a button.

Custom scoreboard + 16:9 live video + ad banner on a single LED board.

06 VERSIONS · FULL VS LIGHT

	SPORT IN THE BOX FULL	SPORT IN THE BOX LIGHT
Sports supported	All available sports	1
Screen controllers	Unlimited	1
Combined output	YES	NO
Templates for scoreboard	YES	YES
Templates for TV	YES	YES
Key & fill output (SDI/NDI)	YES*	NO

* REQUIRES COMPATIBLE HARDWARE

07 TECHNICAL SPECIFICATIONS

VIDEO INPUTS	Multiple simultaneous live inputs · SDI, HDMI or NDI
VIDEO OUTPUTS	Almost any format and resolution · output windows freely sized and positioned on the desktop · no external scaler needed
GRAPHICS	Sport-specific templates · full-screen scoreboards + TV overlays · user-set colors · custom graphics on request
KEY & FILL	SDI / NDI key & fill output (FULL version, compatible hardware required)
MATCH DATA	Live data link to Score Pilot game console · team & player databases per sport
MEDIA	Playout of stored images and video · instant replays

08 HARDWARE OPTIONS

Sport In The Box Laptop

Portable all-in-one production — ideal for clubs and smaller venues.

Rack-mount computer

Fixed installation power for larger arenas and multi-screen setups.
