ATU-X
Swimming Solution

The ATU-X timekeeping system is a perfect entry level solution for smaller competitions. Offering a completely automatic timekeeping system fully compatible with Wingrodan result handling software.

The system is also a suitable as a backup system running beside a top level Quantum or Ares timekeeping system.

The system consists of five components, first the ATU-X timekeeping unit that contain the system clock and logic. With a large color backlit display it gives the operator easy feedback of timekeeping status. The ATU-X have an internal backup battery that ensures safe operation. A backup printer is connected to the ATU-X and constantly following each race printing all pulses.
Finally the system is also connected to the pool deck cabling, that has nine input modules.
One for each lane (1-8) and one for the start input. A pushbutton is connected to each lane input.

The start input can either be connected to a pushbutton, or as an
option to an acoustic start system.

The system can also be upgraded with the 8 row LED8 numerical scoreboard. This scoreboard can be connected via cable or as an option with wireless connection to the ATU-X.
